

**Instructions:** Write name legibly. Explain so that smart people who have not taken our class will understand.

**Which of the following sentences are true? Which are false?**

- True False Philosophers of centuries past and experimental philosophers have studied intuitions.
- True False Experimental philosophers and other philosophers study intuitions in the same way.
- True False Experimental philosophers assume that we should believe the majority opinion.
- True False One of the aims of experimental philosophy is to determine the reliability of intuitions.
- True False Experimental philosophers want to replace philosophers with experimentalists.

**The ‘experimental’ in “experimental philosophy” is intended to mean...**

- (a) radically unconventional.
- (b) scientific in methodology.
- (c) speculative and untested.
- (d) b and c
- (e) none of the above.

**What do experimental philosophers want to do with the philosophical methods of centuries past?**

- (a) Get rid of them.
- (b) Replace them with experimental methods.
- (c) Add experimental methods to them.
- (d) a and b
- (e) None of the above.

**The primary goal of experimental philosophy is to**

- (a) offer an account of the internal psychological processes that underlie our philosophical judgments.
- (b) determine the percentages of people who hold various sorts of intuitions.
- (c) explain why philosophers’ expertise makes their intuitions better than non-philosophers’ intuitions.
- (d) a and c
- (e) None of the above.

**Complete the following sentences from “An Experimental Philosophy Manifesto”**

“the first major goal of experimental philosophy ...is to determine \_\_\_\_\_

\_\_\_\_\_

[so] that we can use this information to help determine \_\_\_\_\_

\_\_\_\_\_. (p. 5)

“Surely, the degree to which an intuition is warranted depends in part on \_\_\_\_\_

\_\_\_\_\_

and surely the best way to figure [that out] is to \_\_\_\_\_

\_\_\_\_\_. (p. 6)

**In your words, explain the activity and purpose of conceptual analysis (p. 2).**

**In your own words, explain what Knobe and Nichols mean by ‘unreliable’ in “a belief that is the result of an unreliable or distorting internal source” (pp. 5-6).**

**In your own words, explain the strongest version of the expertise objection, version 1 (p. 6).**

**In your own words, explain the strongest version of the expertise objection, version 2 (p. 7)**

**Complete the expanded versions of these arguments.**

*We wouldn't find cultural diversity in philosophical views if they tracked truth. But we do find that diversity.*

*If \_\_\_\_\_ then \_\_\_\_\_.*

*It is not the case that \_\_\_\_\_.*

*So, \_\_\_\_\_.*

*If experimental philosophy studies central philosophical questions, then it's philosophy. And it does study them.*

*If \_\_\_\_\_ then \_\_\_\_\_.*

*It is the case that \_\_\_\_\_.*

*So, \_\_\_\_\_.*
